

2,250 tonnes on farm. Variety mix is Janz (~50%) Diamondbird (40%) and Ventura (10%).

He has it stored in 10 bags and also a 600t silo. He hasn't taken samples yet but dragged 1 load into town for every 2 stored on farm. Below is a schedule of test results from stuff taken into town. Breakdown of stuff in town is 52% H2, 29% AUH2, 13% AGP1, 3% APW1, 3% H1

His rough ideas of quality of each bag (i can press him for firmer estimates/test results of this) are:

Bags 1-4 range from H2 to AUH2 with small amount of AGP1

Bag 6 H2 and AUH2

600t silos H2

Test results for stuff in town:
